

HTML Assignment: Build a Student Registration Page

Problem Statement

Create a complete HTML page for a fictional college's **Student Registration Portal**. The page should contain:

- Structured HTML with proper use of <head> and <body>
- Headings and paragraphs to describe the form and instructions
- Usage of text formatting tags (like bold, italic)
- Links to external resources (like college website)
- An image (college logo/banner)
- A properly formatted table for course list
- Ordered and unordered lists
- A fully functional form using different input types (text, email, radio, checkbox, dropdown, textarea, etc.)
- Use HTML comments to mark important sections
- Ensure basic accessibility (label associations, placeholders, alt attributes for images)
